Certificate

about the product

Dr. Baby Diaper Size 5

Clinical application study under dermatological control
(Test period March/April 2026)

Study number ST-AT-2026-00079

The test product was applied over a period of four weeks by 20 subjects several times a day at the diaper area. From the clinical-dermatological and specialist point of view no relevant skin reactions occurred in the test area. The product was tolerated

„excellently"

Neither intolerance reactions suggestive of irritation nor allergic reactions (contact dermatitis) were detected. Accordingly, from the dermatological point of view there is no high potential for irritation and sensitization by the tested product when used as intended.

Based on the study design chosen and the confirmed skin tolerability, **the 5-star seal and the skin friendly material seal can be used** for the test product.
